Child Progress Report (Birth-12 months)

From the time they are born, infants bond with adults, developing loving relationships that provide comfort and build confidence as they begin watching and listening to the world around them.

The time from birth to 12 months is an amazing stage when infants grow from being completely helpless to demonstrating the beginning abilities of communicating and self-care.

The skills included in this booklet show your infant's progress over the last several months. Communicating, developing relationships, emerging motor skills, and increasing cognitive development make this an exciting time for parents and teachers!
